## Summary

Aspiring Data Engineer with hands-on experience building end-to-end ETL/ELT data pipelines, data modeling, and ETL automation using Python, SQL, PySpark, and Databricks. Proficient in data warehousing with Snowflake and Delta Lake, workflow orchestration via Apache Airflow, and cloud computing on AWS. Passionate about scalable data systems, automated testing, and transforming raw data into analytics-ready datasets.

## Experience

**Data Science Intern – Manac Infotech Pvt. Ltd., Hyderabad | Nov 2024 – Jan 2025**

- Developed a Students Attendance Visualization system using Python, Matplotlib, NumPy, and Pandas with 3 modules — CSV uploader, pie chart, and week-wise histogram — tracking 4 attendance categories across semesters.
- Applied Scikit-learn ML models to predict student performance based on attendance history, supporting early identification of at-risk students.

## Projects

### FMCG Data Pipeline:

*Databricks | Delta Lake | PySpark | AWS S3*

- Architected an end-to-end ELT pipeline on Databricks implementing a 3-layer medallion architecture (Bronze → Silver → Gold) for data modeling across 4 AWS S3 data sources.
- Engineered full and incremental load strategies with automated data quality fixes — deduplication, multi-format date normalization, and spelling corrections — delivering reliable, analytics-ready Delta Lake tables.

### Stock Price Data Pipeline:

*Python | Databricks | JSON | AWS*

- Built a Python-based ETL automation pipeline to ingest and transform real-time stock data for 5 tickers (RELIANCE, AAPL, MSFT, GOOGL, AMZN), processing 1,100+ records per session.
- Orchestrated feature transformations in Databricks notebooks and delivered structured JSON datasets for financial analysis and modeling.

### dbt Data Pipeline Project:

*dbt | SQL | Delta Lake*

- Designed a modular ELT pipeline on Snowflake using dbt with 5 data models across 3 layers (Staging → Intermediate → Marts) following Big Data modeling best practices.
- Implemented 5 automated tests (uniqueness, nullability, referential integrity, accepted values, date validation) serving as a CI/CD quality gate, and a custom macro for discount calculations to ensure data reliability.

## Certifications

HP life - Data Science & Analytics (Sep 2024)

[Certificate](#)

Microsoft Power BI - Arasmo Technologies Pvt. Ltd. (Nov 2024)

[Certificate](#)

Introduction to SQL certification (Sep 2024)

[Certificate](#)

## Technical skills

**Programming Languages:** Python, SQL, Scala

**Data Engineering:** Apache Spark, PySpark, Databricks, dbt, ETL/ELT Pipelines, ETL Automation, Delta Lake, Snowflake

**Data Warehousing & Modeling:** Snowflake, Delta Lake, Medallion Architecture, dbt Data Modeling

**Cloud:** AWS (S3, IAM, EC2)

**Workflow Orchestration:** Apache Airflow

**Tools:** Git, Unity Catalog, Confluence

**Practices:** Agile / Scrum, Data Quality Monitoring

## Education

**B.Tech – Computer Science & Data Science** | CGPA: 8.2 / 10 Lords Institute of Engineering and Technology (Osmania University)

**Intermediate – 12th Grade** | 92% Pratibha Junior College, Mahbubnagar

**Secondary School Certificate – 10th Grade** | GPA: 10 / 10 Chaitanya High School, Mahbubnagar
